(54) Title: POURING SPOUT FOR A CONTAINER INCLUDING A LIQUID, CONTAINER, METHOD AND USE HEREOF

(57) Abstract: The invention relates to a pouring spout (1) for a container holding a liquid, said spout comprising outer tubular means (2) and inner tubular means (3) with an inner passage (11) for said liquid from the container to the exterior. The inner tubular means (3) being partly or totally integrated in said outer tubular means (2) and said means being movable in relation to each other. The spout further comprises a stick (4) including closing means (5) at one end for closing or opening said inner passage (11) by movement of said outer or inner tubular means in relation to each other. The invention also relates to a container, a method and use hereof.
